

The *IKF* Bruce Lee Collectors' Guide

For the first time anywhere, *Inside Kung-Fu* has compiled a list of the most valuable and coveted items available to Bruce Lee collectors. Clip and save this special section, so the next time a swap meet offers a Bruce Lee "original" item, you'll know if it's worth the price.

By Dave Dexter

What makes someone begin to collect memorabilia connected with an individual? Memorabilia means worthy of being remembered and perhaps that alone is the answer. Bruce Lee was a man with awesome martial arts abilities. He had a magnetic personality and he came across on the screen as a giant presence. Even those aware of how special effects in fight scenes are created by the movie industry knew what Bruce Lee did was in a class by itself.

Perhaps Bruce Lee collectors quite simply want to be part of something special. I found myself caught up in the already flourishing craze in 1979 when I visited the former Bruce Lee Museum in Hollywood. Seeing the Lee mystique in such a setting sparked my interest and I began collecting a few items, but I discovered I had entered the game much too late. I sold the few collectibles I had managed to find.

In 1983 I met a gentleman who owns a collectibles shop. He specializes in 1960s toys and games. Bruce Lee was the co-star of a TV series called "The Green Hornet." I can remember as a kid having Green Hornet toys, but I never imagined that one day these toys would become so valuable. Green Hornet and "Kato" memorabilia was being collected and

I subsequently met and talked with several collectors. Each had a respectable collection and had items the others did not. It was too late for me to become a serious collector, so I decided to become involved (share the excitement) by meeting Bruce Lee collectors, talking to them and learning more about the legend of the "Little Dragon."

The bulk of information and material about Lee burst on the scene between 1973-1976. Magazines all over the world had his photograph on their covers and featured articles and more photos inside. Every scrap was snapped up and there were no reprints. When Bruce Lee died, many foreign publishing houses released memorial issues. A few were accurate, most were not, but that didn't matter to the collector because he couldn't read Chinese, French, German, Japanese and all the other languages in which the publications were printed. Some issues were printed with high-quality photographs and on a good grade of paper. Numbered issues became a real treasure. The best of the foreign magazines are *Japanese Screen*, *Roadshow* and *Young Idol Now*, with many issues devoted entirely to Lee. The earlier issues are valued at \$50-\$100.

A French publisher, Rene Chateau, published three softcover books that are becoming increasingly hard to find: *La Legend du Petite*

Dragon, Bruce Lee Inedit, and the third, *The Tragical Life and Death of Bruce Lee* by Linda Lee, which was not sold in the United States. The book is highly sought after and is valued up to \$75 a copy. The rarest and possibly largest of the foreign magazines was the 1974, first printing, *Giant Bruce Lee Scrapbook*. Its size (11x15½) and number of pages (only 32) made this a unique, yet fragile and hard-to-find collectible. With a reputed 1,000 first printings (not confirmed), this issue can run as high as \$100.

Other than Lee's personal belongings, the most sought after item remains the *Philosophical Art of Gung Fu* by Bruce Lee. The 1963 original edition by Oakland Book Sales (sold mail order) was not meant to be mystical or intricate in its approach to gung-fu, but rather a basic, *no-nonsense* application to one of many fighting arts before jeet kune do came into being. Though not of the best paper quality, Lee wrote the book himself and many find the section on yin and yang informative. In reprint, martial artists, fans and collectors who could never hope to find an original can now enjoy its contents and photos. Depending on condition, the book is valued anywhere from \$250-\$400. Those owning an autographed copy could, of course, name their price.

Following is a sampling from a possible Bruce Lee catalog to be released later. Fifty items per category have been listed. There are literally thousands of books, magazines, posters, photos, toys and other items that have been produced. Prices listed are subject to change depending on condition, dealer and availability. Although the author made every effort to be authentic in description and current prices, no guarantee is implied.

ENTER THE DRAGON

Production Notes

Two leading American moviemakers, China's most popular action star and a popular American film and television star have come together in Hong Kong, bringing a fresh look to those roaringly successful films about the martial arts.

The American producers are Fred Weintraub and Paul M. Heller. The stars are Bruce Lee and John Saxon. The explosive drama of today's martial arts is "Enter the Dragon," Warner Bros.' Panavision release which also stars Ahna Capri and introduces Jim Kelly.

The martial arts of Asia are man-to-man styles of fighting which run the gamut from very rugged sport to deadly combat. They include karate, hapkido, kung fu and judo.

Recently, screen dramas tied to the martial arts have become enormously popular around the world. "Enter the Dragon" marks the first time that a major American film company has gone to Hong Kong, birthplace of martial-arts movies, to make an international martial-arts film. The huge cast engaged by producer Weintraub and Heller unites the talents of the United States, Europe and the Orient.

Bruce Lee was a major factor in the international success of martial-arts motion pictures. His combination of physical strength, good looks and acting style made him the top martial-arts star in films. In "Enter the Dragon," Lee portrays a James Bond-type super secret agent drawn into combat with a clever criminal who uses a martial arts academy to mask a career in international crime.

Unfortunately "Enter the Dragon" is young Lee's last picture; shortly before its release, he died unexpectedly in Hong Kong. He was 32 years old.
